IDIKA SA is a public owned IT company supervised by the Greek Ministry of Labour, Social Security & Welfare.

IDIKA serves as the IT solution provider for Social Security & Welfare but also for the Healthcare Domain.

Its main objective is to design, develop, operate and support IT systems for the Social Security Funds (social security contribution, pensions etc) and HealthCare Service Organizations in Greece.

IDIKA is responsible for the National ePrescription/eDispensation system in Greece with >98% coverage of doctors and pharmacists.

IDIKA also operates and supports the ERP system of 14 public hospitals and the National System for Medical Appointments in Primary Care.

In the cross border domain, IDIKA acts as both the National Contact Point for eHealth (NCPeH) and Social Security (EESSI Access Point).

Efficient control & expenses rationalization

Patient safety and quality of care

Policy making & planning in the area of primary health care

Scientific support to doctors and pharmacists
